

BACHELOR OF SCIENCE IN ARTIFICIAL INTELLIGENCE
SHAHEED ZULFIKAR ALI BHUTTO, INSTITUTE OF SCIENCE AND TECHNOLOGY
COMPUTER NETWORKS (CSCL3209)
(4TH SEMESTER, 2ND Year)
COMPUTER NETWORKS PROJECT

Name: _____ Roll No: _____

Score: _____ Signature of the Lab Tutor: _____ Date: _____

Project name: (write your project Title here)

Performance Objective:

After completing this project, students will be able to:

- Explain the expected outcomes based on the project idea they selected.
- Demonstrate the implementation of networking concepts through simulation.

Requirements

- **Software:** Cisco Packet Tracer

Introduction

This section should include:

- **Overview of the Topic:** Briefly describe the general area your project idea belongs to (e.g., routing protocols, IoT setup, LAN/WAN design).
- **Key Concepts and Background:** Mention relevant networking concepts required to understand and implement the idea.
- **Importance and Scope:** Explain why your selected project idea is important and what problem it solves or what scenario it demonstrates.

Methodology (Implementation Steps)

This section should provide a detailed explanation of how you implemented the project in Packet Tracer:

- **Project Description:** Describe how your idea works in Packet Tracer.
- **Step-by-step Implementation:** List each step taken to build and configure the network.
- **Optional:** Add flowcharts or network diagrams if necessary to explain your approach clearly.

COMPUTER NETWORKS PROJECT

Results and Discussion

This section must include:

- Snapshots: Insert clear screenshots of your Packet Tracer simulation showing the working model.
- Results: Describe what the simulation shows and how it meets your expectations.
- Discussion: Briefly analyze any challenges you faced and how you solved them, and whether the outcome matches your original idea.

Conclusion

- Summarize your work by stating:
- What you have learned from this project.
- The effectiveness of your implementation.
- Any future improvements or learning opportunities.
